

BIKE BUS WORLD

We transform communities and our planet through the simple act of riding bikes to school together.

WHAT WE DO

Bike Bus World is an organization designed to help communities launch their own group rides to school. We do this by providing organizers with the tools and guidance to create bike buses, helping them advocate for active transportation infrastructure and policy, and securing funding both locally and nationally. Through this, we aim to demonstrate the positive impact of bike buses.

WHO WE ARE

We're bike bus organizers and sustainable transportation advocates from across the country leading the next and most-promising movement for active transportation. Having helped start over 15 bike buses and inspire countless more throughout the country, we have a collective 200,000+ social media followers, have been featured by the New York Times, Bloomberg, Wired, BBC, ABC, and Fox News. We have also successfully lobbied state and local governments for positive changes around safe routes to schools, infrastructure improvements, and funding for active transportation.

HOW WE CREATE CHANGE

- + Create and scale tools for organizers to use
- + Help organizers start new bike buses
- + Help bike buses grow and go viral
- + Turn organizers into advocates
- + Show the value and benefits of bike bus
- + Secure funding for bike buses
- + Lobby elected leaders for change
- + Promote protected infrastructure

HOW TO GET INVOLVED

WHAT'S BIKE BUS?

Bike Bus is a global movement. In a growing number of cities and towns around the world it is a regular mode of transportation to safely and joyfully bike with kids to school. Think of a bike bus like a school bus, but instead of a big yellow vehicle, we're a large group of people—kids, parents, and helpers—biking to school along a fixed route and schedule. School buses run on gas; bike buses run on joy.

WHAT'S THE IMPACT?

- + Induce active transportation usage
- + Increase climate solutions mode shift
- + Improve public health and wellbeing
- + Enhance social connectedness, community, belonging
- + Increase and enhance equity
- + Reduce roadway deaths, injuries, and car traffic
- + Reduce noise and air pollution

WHY DOES IT MATTER?

We're living in a moment of interlinked global crises all which can be uniquely addressed by just biking more. These include climate chaos, divided communities, childhood health issues, and a loneliness epidemic. By helping kids and families ride to school together, we are creating safety in numbers and creating joy while helping people shift trips to active transportation, reducing car traffic, fostering community, and fighting climate change. The cost of driving a car is increasingly unaffordable—encouraging biking is an easy and inexpensive way to increase equity and wellbeing.

Picture this:

Children feel the joy of freedom
Communities bond while pedaling
The chore of getting to school is a delight
Our daily actions are a climate solution
Wellbeing is prioritized on streets
It's normal for children to transport themselves

The sound of traffic is quiet
The sound of laughter is vibrant
Our world heals and grows anew

This dream is happening today.

It's called Bike Bus—
a growing family-led global movement
to ride to school en masse.

Come ride with us.
